

colours & yarns for weaving

Company profile

SINTERAMA, European leader in the production of coloured polyester threads and yarns, was born in 1968 in Biella (Italy), a pleasant town located at the foot of the Alps, where the textile culture is deeply rooted in an ancient tradition. Since then, in 50 years of development, **SINTERAMA** has built important partnerships with its clients, offering the most innovative solutions, investing in product research and giving collaboration and service the utmost attention. In line quality control, the automation of processes and the flexibility of production systems represent some of our points of excellence and ensure the highest quality and production standards.

At present, **SINTERAMA** produces a vast range of products able to satisfy any requirement for fabrics for **automotive, furnishing, clothing and technical end uses**. Since the year 2000, the company has started a major internationalization process, setting up production sites in UK, Bulgaria, Brazil and China.

Overall **SINTERAMA GROUP** produces over 30,000 tons of thread a year in 1200 different varieties, employing 900 people and relying on a network of a 100 strong team of professional sales representatives and commercial employees able to support over 1,200 customers in 70 different countries, generating a total revenue of 135 million Euros.

RESEARCH AND DEVELOPMENT

For **SINTERAMA** research and innovation are the driving forces of its development and a solid guarantee of its future. By investing around 3% of our yearly revenue, we finance a wide range of research activities in direct collaboration with our customers, in order to be able to meet their specific needs and ensure the best results.

The research ranges from the chemistry of polymers and additives to the dyeing materials and processes, from the development of detection and automation systems to the renewal and constant evolution of products and their manufacturing.

ENVIRONMENT

In **SINTERAMA** we take special care when it comes to ecological conservation and working environment. Our focus is on:

- Cutting down energy consumption.
- Preserving the surrounding environment and the natural resources affected by the presence of our sites and their activities.
- Safety of our employees and of the environment, setting strict regulations on both procedures and materials used.
- Use of recyclable materials with an active collaboration in refuse collecting and recycling operations.
- Compliance with **Oeko-Tex** standards.
