

# zerbion<sup>®</sup> STAR

*Extra bright Polyester*

colours & yarns for weaving

With a large number of colors, even more bright and solid than Zerbion Lux, is the new born in Sinterama: **ZERBION® STAR**.

Super bright dope dyed flat yarn, designed to give a particular brightness and chromatic effect to fabrics for furnishing and apparel.

**ZERBION® STAR** combines its super brightness to all the technical characteristics of polyester to produce fabrics able to achieve unique performances not only in the areas in which it has been studied, but also in the field of technical textiles, automotive and textile accessories

The dope dyed colors, selected and studied following the trends of the market, are available in the basic count... ready to be processed by inserting a single ingredient: fantasy.

**ZERBION® STAR** is available in the counts **160/100** and **300/100**.

**And then... move to FANTASY... create your own.**

The versatility and flexibility of production allows to combine several counts and colors through the different available technologies to create custom items personalized in type, count and color and are all unique.

Declining these basic counts then arise:

**ZERBION ICE**: flat and melange yarn for moved chain.

**AIRLAN MINI LUX** from 160 dtex up to 12000 dtex in the Maxi Lux version and **MINIGLANCE** that also adds the melange effect.

Prepared in very short time and with impressive minimal quantity.

**TEXLUX** textured brilliant melange version with light and dark effect.

These articles give to the fabric or items produced special effects in brightness, chromaticity, melange tone on tone and contrast.

All the range of these products that derive from **ZERBION® STAR** card are made of 100% polyester dope dyed, this translates into a significant saving as regards the consumption of water during the production and subsequent cleaning processes.
